

Dyno Nobel Asia Pacific Pty Limited

ABN 38 003 269 010

Price List

Effective 1 January 2026

Supersedes all previous price lists

The logo for Dynonobel is displayed in a large, bold, blue serif font. The word "DYNONOBEL" is split across two lines: "DYNON" on the top line and "OBEL" on the bottom line. The letter "O" in "DYNON" is stylized as a circle with a concentric inner circle. A registered trademark symbol (®) is located at the end of the word "OBEL".

CUSTOMER RELATIONS

Order Placement

Our Customer Relations Team is based in a number of locations throughout Australia. They will manage and oversee the order fulfilment process from customer order placement, sourcing of product, freight, through to invoicing.

Orders are accepted via telephone or e-mail. Contact information is available on page 3.

All Sales are on [Dyno Nobel's Standard Terms and Conditions of Sale, available on the Dyno Nobel website here.](#)

Product Collection

Dyno Nobel offers both delivery of product and sale of product ex gate.

- Delivered product is priced at ex gate plus the prevailing freight rate at time of delivery. Please contact your Dyno Nobel representative for more information.
- Dyno Nobel does not offer any product on consignment.
- Dyno Nobel can establish bulk explosives delivery depots on mine sites. Contact your Dyno Nobel representative for more details.
- For security and safety reasons, Dyno Nobel no longer supplies product on a cash sale basis. For non-account purchases, please call our Customer Relations Centre.
- All customers must have a licence applicable to the product they are purchasing and Dyno Nobel reserves the right to call for a copy of the relevant licence before it agrees to sell or release the product.

Product Distribution

Dyno Nobel produces and supplies a full range of blasting products, services and technology to customers in the mining and construction industries. Dyno Nobel provides customers with ammonium nitrate products, bulk emulsions, bulk ANFO, cartridge products, initiation systems, electronic detonators and a range of blasting accessories.

Prices are quoted in Australian dollars (AUD) and are GST exclusive. Prices apply for goods ex-warehouse in Australia (Helidon, Bajool, Kalgoorlie).

PACKAGED EXPLOSIVES

POWERMITE® PRO, DYNOSPLIT® PRO, and Z-BAR®

The POWERMITE PRO series provides a choice of sizes suitable for a variety of blasting conditions.

The DYNOSPLIT PRO series provides perimeter control blasting in continuous cartridge form, also available as RiGHT® version where hot and/or reactive ground conditions exist.

Z-BAR is a contour product, designed to deliver precision blasting in wet or dry underground developments.

INITIATION SYSTEMS

NONEL® LP Series

The NONEL LP series provides an effective in-hole initiating system for underground mining and construction applications. Effective and accurate in-hole long period timing sequences are available, featuring 19 delays ranging from 25 to 8000 milliseconds.

Product Description	Unit of Sale	Unit / Case	List \$ / Case*	List \$ / Each*
NONEL LP 3.6m	Case	250	1,757.50	7.03
NONEL LP 4.8m	Case	200	1,494.00	7.47

NONEL LP 7.2m	Case	150	1,699.50	11.33
NONEL LP 24m	Case	30	906.30	30.21

NONEL® MS Series

The NONEL MS detonator is a millisecond, high strength delay detonator series featuring 28 delays ranging from 25 to 1000 milliseconds. The NONEL MS Series is an effective down-hole initiating system for a wide variety of mining applications. When used in conjunction with surface delays, the NONEL MS Series gives effective and accurate down-hole timing sequences.

Price list

NONEL® MS HD Series

The NONEL MS HD Series provides added strength for heavy duty applications with a wider selection of lengths and delays. The standard delay range features 28 delays ranging from 25 to 1000 milliseconds. Extended delay range going up to 44 delays ranging from 25 to 8000ms is available in the 24m products.

Product Description	Unit of Sale	Unit / Case	List \$ / Case*	List \$ / Each*

NONEL® MS CONNECTOR™ Series

The NONEL MS CONNECTOR Series provides an effective surface delay system appropriate for mining and construction applications. The NONEL MS CONNECTOR is used in combination with detonating cord to provide millisecond timing.

Product Description	Unit of Sale	Unit / Case	List \$ / Case	List \$ / Each
NONEL MS CONNECTOR	Case	200	4,078.00	20.39

NONEL® STARTER™

NONEL STARTER is used as a lead-in line from a safe firing position to the blasting location. It can be used to initiate blasts with NONEL detonators or detonating cord. A NONEL STARTER consists of a length of NONEL tube sealed at one end and a NONEL detonator and connector block attached at the other end.

Product Description	Product Code	Unit of Sale	Unit / Case	List \$ / Case	List \$ / Each
NONEL STARTER 100m	68670M0100	Case	16	1,276.92	79.81
